

SCORPIO

October 23rd – November 21st

Element: Water
Quality: Fixed
Ruling Planets: Mars & Pluto
Symbol: Scorpion

An emotional water sign, Scorpios are known for their mysteriousness and, perhaps, for taking themselves a little too seriously. Like the other water signs, Scorpios are deeply intuitive and crave intimacy. However, it takes a lot to win a Scorpio's trust and it's hard to know where one stands with a secretive Scorpio. Their mystery and passion, however, gives Scorpios a magnetism and, as Scorpio rules the genitals, it's no surprise that people are drawn to sexy Scorpio.

Scorpios are often described as intense because they can often get carried away with their strong emotions, which may cause them to become manipulative and jealous when they find themselves in a situation that is out of their control.
