VIRGO

August 23rd – September 22nd

Element: Earth
Quality: Mutable
Ruling Planet: Mercury
Symbol: Virgin

Give a Virgo a problem and they will solve it. Logical, practical, and detail-oriented, to others, they may come across as know-it-alls, but Virgos are supportive friends who just want to help in the only way they know how. Often caught in the trap of their own perfectionism and sensitivity, Virgos are careful about taking risks.

Represented by the virgin, Virgos are often misrepresented as innocent and young. In actuality, the concept of virginity regarding this sign relates more to the Virgo's independence and the fact that he or she belongs only to themselves. Like the virgin goddesses Artemis, Athena, and Hestia, Virgos owe no allegiance to anyone who may interfere with the sanctuary of their temple.
