

PISCES

February 19th- March 20th

Element: Water
Quality: Mutable
Ruling Planet: Neptune
Symbol: Fish

Head-in-the-clouds Pisces is constantly stuck between fantasy and reality. Ruled by Neptune, the planet of dreams, Pisceans are known to live in a constant state of dreaminess, and some even believe Pisceans have psychic abilities. Because of this, some people may think that they are delusional and out of touch with reality.

Pisceans are extremely empathic, almost to a fault and, as an emotional water sign, they are often drowning in feelings, whether those feelings belong to them or someone else. Due to their perpetual daydreaming and ability to feel emotions so deeply, Pisceans are famously talented artists and creatives.
