

TAURUS

April 20th – May 20th

Element: Earth
Quality: Fixed
Ruling Planet: Venus
Symbol: Bull

Ruled by Venus, which governs money, love, and beauty, Taurus is the most sensual sign of the zodiac. Taureans live for comfort and luxury, but don't think they're lazy. Taureans will work hard all day so that they can come home to enjoy good food and all of the beautiful things in their home, confident that they've earned their worldly comforts.

As a fixed sign, Taureans love security and stability. Sometimes, a Taurus might linger for longer than necessary in unhealthy relationships or other situations, if only to make a point. While a Taurus may see their commitment to consistency as dedication, others often perceive Taureans to be extremely stubborn. Though some find it frustrating when a Taurus won't budge, their steadfastness is what makes Taureans loyal and reliable.
